

Contents

Linear Equations and Graphs	1
Session 1 Linear Equations. Concepts and Practice.....	2
Session 2 Linear Simultaneous Equations. Concepts and Practice.....	8
Session 3 Linear Function. Concepts and Examples.....	26
Session 4 Linear Equations and Functions. Practice.....	36
Quadratic Polynomial, Equations and Functions	58
Session 5 Factorising Quadratic Polynomial. Solving Quadratic Equations.....	59
Concepts and Practice	
Session 6 Quadratic Function (Parabola). Theory, Features and Examples.....	72
Session 7 Quadratics. Practice 1.....	84
Session 8 Quadratics. Practice 2.....	92
Session 9 Quadratics. Practice 3.....	103
Cubic Polynomial, Equations and Functions	116
Session 10 Cubic Polynomials. Concepts and Examples.....	117
Session 11 Cubic Equations. Concepts and Examples.....	126
Session 12 Cubic Equations. Concepts and Examples.....	131
Session 13 Cubic Equations and Functions. Practice.....	138
Functions, Relations and Transformation of Graphs	148
Session 14 Functions and Relations. Key Definitions, Terminology and Concepts.....	149
Session 15 Transformations of Graphs. Key Techniques and rules.....	153
Session 16 Transformation of Graphs. Practice.....	162
Session 17 Transformation of Graphs. Practice Exam Style of Questions.....	172
Session 18 Polynomial Functions (Quadratic and Cubic). Practice Exam Style.....	189

Exponential and Logarithmic Equations and Functions.....203

Session 19	Index and Logarithm Laws. Rules and Examples.....	204
Session 20	Exponential and Logarithmic Equations. Concepts and Examples.....	216
Session 21	Exponential Equations. Practice.....	222
Session 22	Logarithmic Equations. Practice.....	231
Session 23	Exponential and Logarithmic Functions. Concepts and Examples.....	236
Session 24	Exponential and Logarithmic Equations and Functions. Practice.....	245

Trigonometry.....256

Session 25	Trigonometric Ratios, Unit Circle and Exact Values.....	257
	Definitions, Concepts and Examples	
Session 26	Trigonometric Functions. Notes and Examples.....	265
Session 27	Trigonometric Equations. Concepts and Examples.....	273
Session 28	Trigonometry. Practice 1.....	286
Session 29	Trigonometry. Practice 1.....	295

Differentiation, Integration and Application.....304

Session 30	Rate of Change. Definitions and Examples.....	305
Session 31	Differentiation. Definitions. Concepts and Examples.....	314
Session 32	Differentiation. Practice 1.....	321
Session 33	Differentiation. Practice 2.....	327
Session 34	Further Differentiation. Product, Quotient and Chain Rule. Examples.....	334
Session 35	Application of Differentiation. Theory. Concepts and Examples.....	340
Session 36	Application of Differentiation. Practice 1.....	350
Session 37	Application of Differentiation. Practice 2.....	363
Session 38	Application of Differentiation. Practice 3. Exam Style Questions.....	377
Session 39	Integration and Application of Integration.....	388
Session 40	Integration and Application of Integration. Practice	395
